

Intermediate Mechanical Building Services Engineer

Dublin Studio

Do you have a passion for creative engineering? Is achieving a better work life balance an important consideration when deciding where you want to work? If so, consider a move to BDP.

BDP is a quality brand and our studio offers an environment where engineers work together to apply new solutions to engineering challenges, creating some of the most captivating award winning buildings in Ireland and internationally. We are not content with repetitive solutions that produce energy intensive buildings that only achieve client's minimum requirements. We produce designs that set a new industry standard in quality while exceeding our client's expectations. We achieve this by considering each new building as an exciting opportunity to move the industry forward.

Our designers are given the freedom to achieve their potential and are encouraged to develop their skills in all areas of construction.

We are seeking an intermediate mechanical building services engineer to join our dynamic team. The candidate should be an engineer who revels in the opportunity to work on challenging, high profile projects in our stimulating, inter-disciplinary design studio in Dublin. You will have a unique opportunity to work on a diverse range of challenging designs in all sectors including workplace, healthcare, education, retail, leisure, transport and residential.

Skills required

- Strong experience in design of mechanical engineering systems for buildings, together with a keen interest in passive design techniques, sustainable environmental solutions and renewable energy technologies.
- At least five years post qualification experience
- Proven track record in the successful design and delivery of high quality projects across a range of sectors.
- AutoCAD and REVIT skills are essential.
- Self-motivated with good time management skills
- Excellent written and verbal communication in English with an understanding of tact, diplomacy and negotiation.
- Engineering Degree and a desire to develop a career.
- A desire to solve problems and produce exemplar projects that inspire pride
- An interest in minimising the environmental impact of design decisions made.

Responsibilities will include design of projects from the concept stage through to completion.

About us

BDP is a major international interdisciplinary practice of architects, engineers and designers working together to create outstanding 'places for people'. Founded in Preston in the UK in 1961, we now have studios across the UK, Ireland, Netherlands, Canada, the MENA region, India, and China. BDP has a leading track record in all major sectors and has over 1000 awards for design quality. In March 2016, BDP combined forces with Japan's leading engineering practice Nippon Koei to form an integrated design group of genuine international reach. Our union with Nippon Koei creates a global design practice that fuses place making and user-centred design with large scale infrastructure skills.

Our engineering studio is vibrant. We offer leading thinking and inspirational solutions in the fields of engineering. Our aspiration as engineers is use our engineering ideas to help shape design rather than simply deliver an architect-led solution. We design structures with maximum value for our clients and minimum impact on the planet.

BDP Offers

BDP offers an excellent opportunity for your personal development as well as an attractive remuneration package that includes a competitive salary, flexible pension allowance, employee profit sharing, private medical insurance, contribution towards professional subscriptions and a great working environment.

To Apply

To apply for this role please e-mail a CV and covering letter marked for the attention of David Brennan to sarah.lavery@bdp.com
